Workload Automation for SAP

Automate and boost your SAP landscape with
HCL Workload Automation

WORKLOAD AUTOMATION

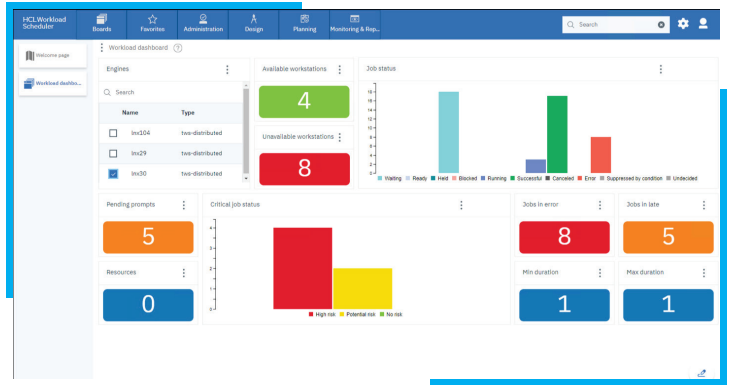

SAP® Certified
Integration with SAP S/4HANA®

Enable business control

The new dashboard features machine-learning for predictive estimation of job duration and easy-to-customize widgets.

Get the best of containers

Deploy all HWA components on containers and manage containerized applications.

Empower users

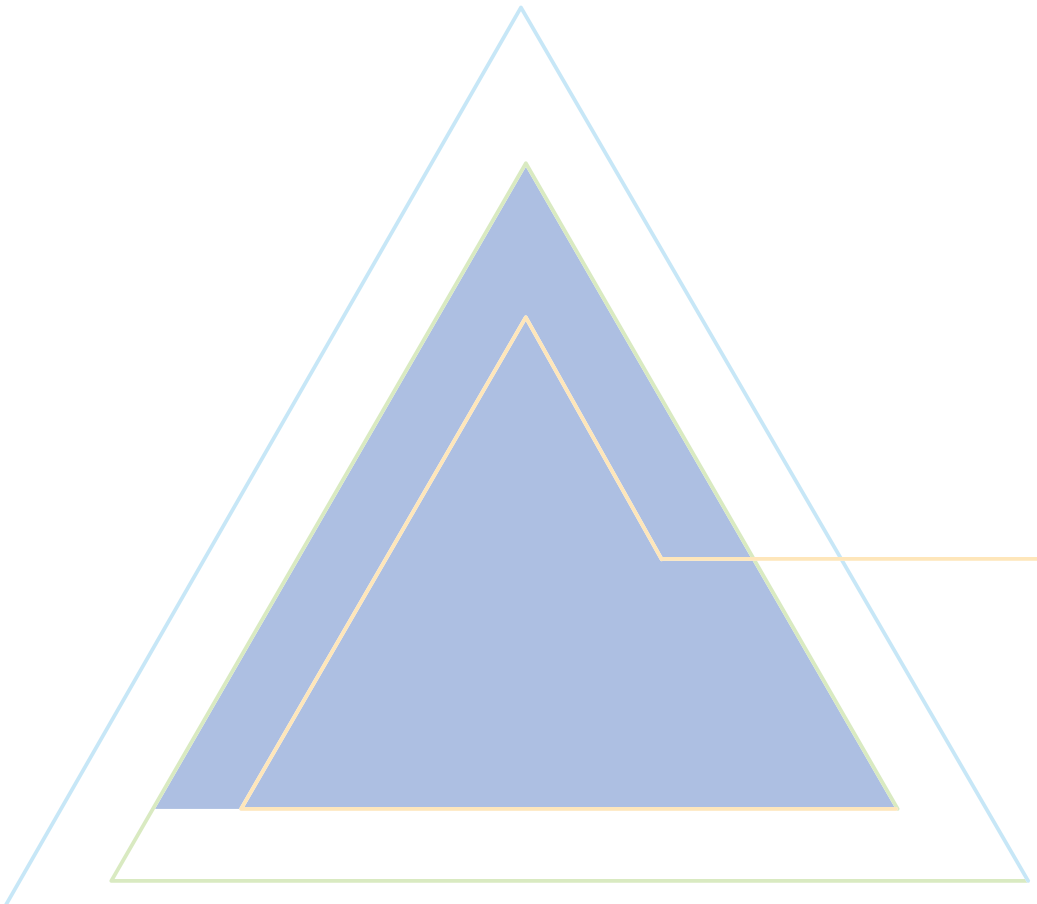

Workload folders provide:

Greater business agility and enforced security at LOB level

Organize job streams in a hierarchy of folders

Key features

Display all elements together

- A single and simplified point of planning, control and optimization
- Templating and easy porting of loads from QA to production

Enable tight governance

- Enforce rules with little effort
- Track modification requests with auditing
- Based on SOA to facilitate rapid changes

Automate end-to-end processes

- Improve process integrity and replicability, and automated recovery
- Optimize execution with throttling to speed SAP throughput
- Implement escalation and automatic ticketing

Job editing and linking

- Creation of jobs on SAP from HWA
- Support for BWI objects, support for other objects in SAP stacks

SAP monitoring agent

- Track child jobs and visualize job graphs, impact views, filtered lists, and dashboards
- Consult details of BI objects, exploit advanced SAP login architectures

Key benefits

Reduce 90% of process errors and increase SAP process reliability

Lower operating cost

Higher productivity

Respect SLAs

Higher control

HCL Workload Automation (HWA) is a recognized market leader in the workload automation space

HWA gives a single point of control for all critical workloads, across the organization, encompassing seamlessly hybrid environments (on-premises, on the cloud, distributed, mainframe).

HCL Workload Automation Integration for SAP allows SAP users to utilize their familiar software environment to improve service delivery and simplify monitoring and managing cross-enterprise jobs.

HCL Workload Automation (HWA) is a recognized market leader in the workload automation space. HWA gives a single point of control for all critical workloads, across the organization, encompassing seamlessly hybrid environments (on-premises, on the cloud, distributed, mainframe). HCL Workload Automation Integration for SAP allows SAP users to utilize their familiar software environment to improve service delivery and simplify monitoring and managing cross-enterprise jobs. HCL Workload Automation integration for SAP provides a unified view for jobs running in both SAP and non-SAP applications. The list of features specifically for SAP is substantial: providing **out-of-the box SAP support for SAP 4/HANA, SAP Solution Manager SAP Business Objects, SAP ABAP, SAP BW, SAP Events, SAP PI, and SAP IDOC.**
