Workload Automation 9.3 and 9.4

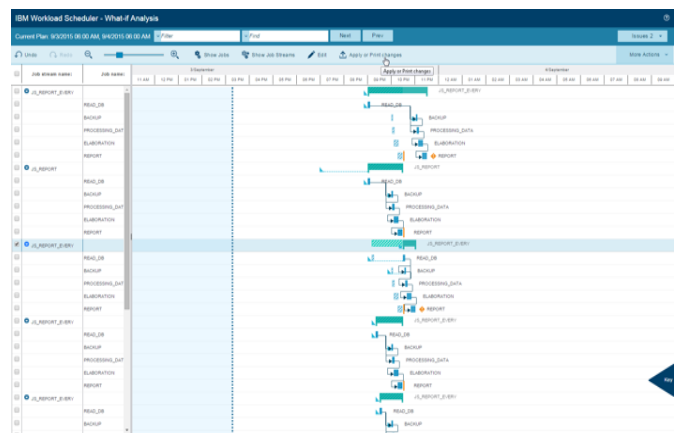

an IBM + HCL product

What's new in release 9.4

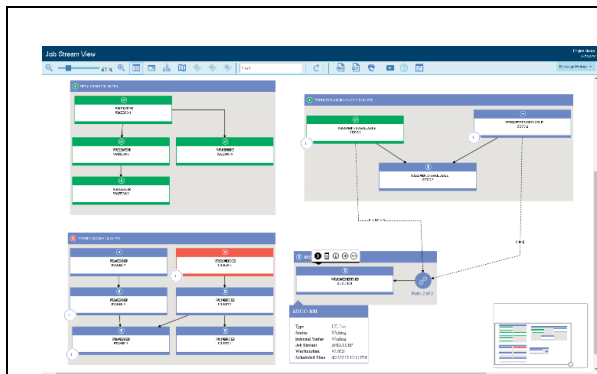

- **Embedded Versioning & Release Management** to safely and quickly deploy new applications and changes
 - Version-controlled objects
 - Compare versions
 - Restore previous versions
 - Promotion of changes across lifecycle stages (Dev, QA, Prod)
- Integration with **ServiceNow** for automated tickets initiation
- **Centralized Auditing** and greater accuracy on scheduling changes
- **Agents upgrade with zero scheduling downtime**, enhancement available also for dynamic agents on back level versions!
- Reshaped modeling **graphical views**
- Enhanced **variable management** in jobs and jobstreams
- New platform support for agents – CentOS, Ubuntu, SLES Little Endian

New scenarios and greater flexibility with v9.4 FP1 and FP2

- **Fast lifecycle management (DevOps)** – Workflows in SCM tools, **UDeploy** plug-ins
- **Workload Rerun flexibility**
- New **File Monitor** and enhanced **job stream triggering**
- Build and integrate your agent image in **Docker containers**
- Easy monitoring through the **new graphical view**
- **Pricing models coexistence** – apply the pricing model that makes sense to your businesses
- **Mainframe modernization: UI enhanced** for z users with **advanced What-if** and **application dependencies**, **New Rest APIs for IWSz**.

9.4 FP3

- **Modifying job definition in the plan, Auto refresh Plan View**
- **New Plug-ins for Cloud Automation** - Amazon EC2, IBM SoftLayer®, and Microsoft Azure plug-ins **Apache Spark Plugin** - you can schedule, monitor and control Apache Spark jobs.

Graphical View

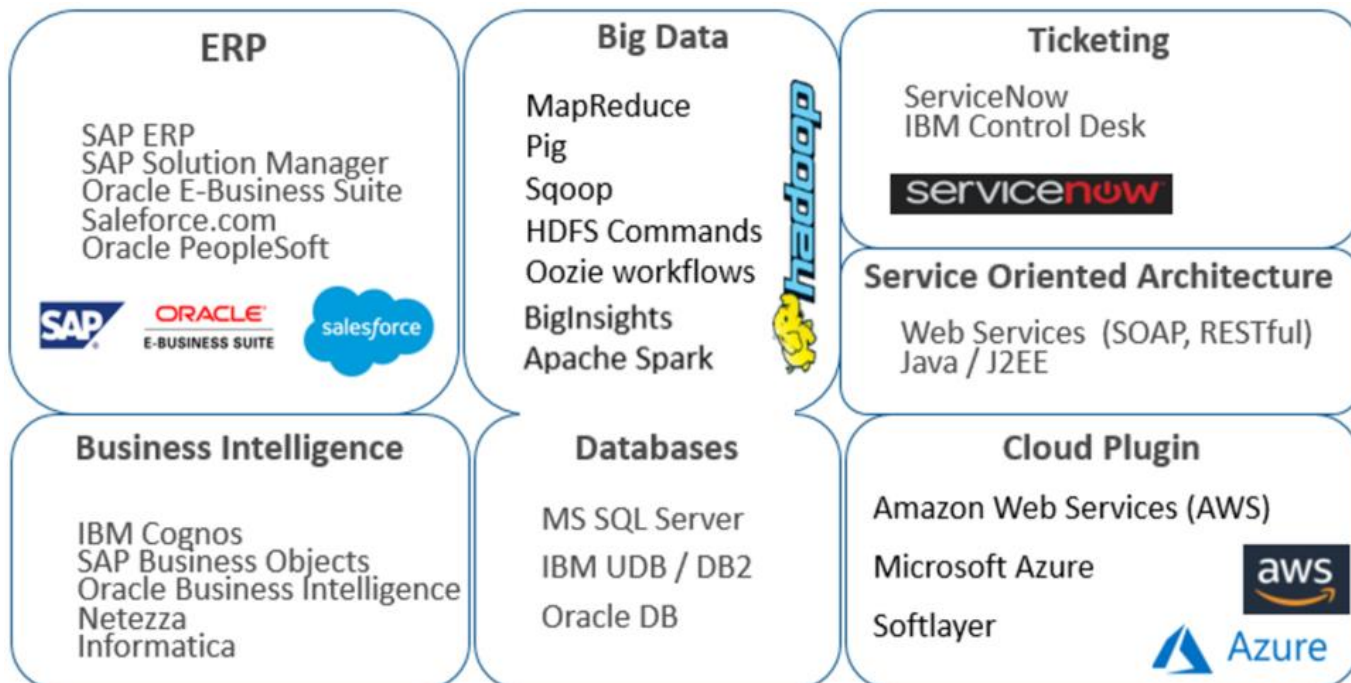

A screenshot of the 'Centralized Auditing' interface. It shows a dialog box titled 'INSERT JUSTIFICATION' with a close button (X). The dialog contains a message: 'Your Administrator requires to insert a justification for changes in this environment'. Below the message, there are several input fields: 'Category' (a dropdown menu with 'Change request' selected), 'Ticket number' (a text input field with '67893' entered), and 'Description' (a text input field with 'Changed the tws user in the job definition' entered). At the bottom of the dialog, there are 'Save' and 'Cancel' buttons. The background shows a partially visible form with tabs for 'General', 'Task', 'Recovery Options', and 'Versions'.

Centralized Auditing

Workload Automation 9.3 and 9.4

an IBM + HCL product

Build new job types for your business applications with +35 business adaptors to simplify and standardize workflows modelling.
